About Us

*Precision, Innovation,
and Global Reach*

Since our founding in Lithuania 6 years ago, Global Snus has evolved into a trusted B2B partner for nicotine and caffeine pouch production. Backed by GMP-certified standards, EU-sourced materials, and rapid infrastructure growth, we've become the go-to choice for high-volume private label solutions.

Advanced Laboratory & Quality Control

Laboratory Excellence & Quality Control

In 2026, Global Snus will operate with full-scale laboratory testing and advanced QC systems to ensure product consistency and compliance.

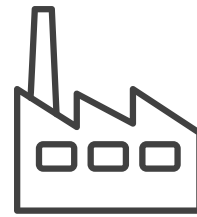

- **Full-scale**
laboratory testing of raw materials and finished products
- **Testing**
Post-production powder testing: nicotine level, pH level, humidity, stability
- **Monthly stability**
Monthly stability testing for long-term product consistency
- **Extended QC**
Extended QC processes covering pouches, labels, and final product appearance
- **Track & Trace**
Full Track & Trace implementation for end-to-end traceability

2029-2030

Scaling for Global Demand

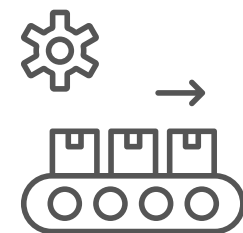

By 2029-2030, Global Snus will launch a 20,000m² advanced facility engineered for GMP compliance and automation. Designed to handle growing demand in nicotine and caffeine pouch sectors, this factory will significantly expand our manufacturing capacity.
